Conclusion/Brief comment:

This application is to erect a single storey side extension which protrudes forward of the existing building line and incorporating a raised terraced at the front of the property.

The new extension would house a master bedroom (at the front) and a dressing room and ensuite along the side of the property. Between the new extension and the front of the property a raised terrace is proposed, the reason it has to be a raised terraced is due to the land falling away to the north.

The majority of the dwellings along the south side of Green Lanes are closer to the road, with parking at the front and large rear gardens. This property is different because it is built at the southern end of the site, meaning it has a very large front garden.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension and raised terrace are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours due to the location of the terrace and extension being right between the neighbouring properties and the west boundary being made up of mature planting.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
