Conclusion/Brief comment:

This is a retrospective application to install a metal framed pergola to the front of the property, and grow climbing plants up three of the six uprights.

The pergola is a round lightweight wrought iron work structure with ornate detailing, which has been painted white with a latticed domed top, late Victorian looking in style. The pergola's lightweight appearance and style matches the pre 1900's façade of the front elevation.

In the summer time the climbing plants will bloom and help the structure to blend into the open character of the front garden. In this instance the lightweight pergola is considered to conserve the character and appearance of the surrounding conservation area. It is not considered to have any detrimental impacts on neighbour amenity.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
