Conclusion/Brief comment:

This application is to erect a small single storey flat roof extension to the west rear elevation of the property to enlarge the kitchen/diner.

The 11sqm extension to the rear of the property is considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

The extension does reduce the size of the external amenity space from 48.4sqm to 33.7sqm. This is quite a small exterior space for the size of the property, but many town properties do have small exterior spaces, as there is considerably higher densities within town centres.

There are also plenty of public open spaces which could be utilised by the occupiers, therefore the slight reduction in exterior space in this instance is not considered to warrant a refusal.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
