Conclusion/Brief comment:

This application is to convert the existing garage by adding a side extension to create an associated living unit, in this instance for an on-site carer or a member of the immediate family.

The garage will increase in size from approx. 23sqm to approx. 35.2sqm, which is not considered to be too extensive and is a good size for a one bed associated living unit. The unit will share the vehicular access to the site, the garden and all utility bills, and is considered to be relatively well related to the main dwelling being approximately 14m away across the driveway.

The proposals achieve a good standard of design, using materials which complement the existing materials. The proposed associated living unit will provide adequate levels of sunshine and daylight, and give the occupiers flexible and adaptable accommodation.

The scale and massing of the new associated living unit is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
