Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The proposed extension, first floor balcony and alterations to the fenestration, adopt a good standard of design by virtue of its scale, form, massing, siting and materials.

The proposal will not have a detrimental impact on the character of the area or visual amenity.

Careful consideration has been given to the effect of the development on the amenities of neighbouring properties, with particular focus to the neighbouring property to the east in respect of overshadowing. Although, based on the position of the existing extension, together with the scale of the development, its orientation and relationship to the adjoining property; leads to the conclusion that the proposal will not result in unacceptable harm to the amenities of neighbouring residents.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies, and accords with the purpose of the Law and the Material Planning Considerations. It is therefore recommended that planning permission be granted, subject to conditions.
