Conclusion/Brief comment:

This application is to enlarge the existing dormer window to form a full height dormer with associated door, raising the head height and inserting a Juliette balcony to the east roof slope and to install two rooflights to the northwest facing roof slope.

Initially the proposals were to increase the size of the dormer to accommodate a set of double doors, with Juliette balcony however, this would have undermined the existing proportions of the roof within Tier 2 of the Hillside Town and thus not

comply with policy GP4, which aims to conserve the visual amenity of viewing the hillside town.

As amended and by reducing the width of the dormer the existing vertical emphasis is retained. Changing a window into a single door is less intrusive and will not have such an impact and as amended the scheme conserves the Conservation Area in accordance with Policy GP4.

The front roof slope rooflights are considered appropriate and acceptable.

The proposals will not result in undue harm to the amenities of surrounding residential neighbours in line with the aims of Policies GP8, GP9 and GP13.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
