Conclusion/Brief comment:

This application is to erect a one and a half storey detached timber framed outbuilding which would house a double garage on the ground floor and storage space above.

The previous applications proposed and were approved for a two storey extension to the west elevation to house a double garage and accommodation above. However,

the most recent application has now omitted the two storey extension in favour of a smaller detached timber frame double garage.

Initially the drawings showed two outward opening first floor windows with no balcony, which raised safety concerns. The application was deferred and the amended drawings now show two large windows instead. As the structure faces the front driveway area and the first floor of the garage is not for residential living the large windows are considered acceptable.

The scale and mass of the detached garage is not considered to have any detrimental impacts on the character and appearance of the surrounding area, nor will it affect any neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
