Conclusion/Brief comment:

This application is to install two ground mounted solar arrays to the south of the property.

The property is very secluded with 2m high fencing all around the area where the solar arrays are to be located.

From looking at the exemptions the only reason why the proposals require planning permission is because they cover a larger area than 10sqm. However, the dwelling sits in a large site and the solar arrays will only cover the small southeast corner of the site and will not be seen from any public vantage points.

Therefore the proposals are not considered to have any detrimental impacts on the character or appearance of the surrounding area, nor will they have any adverse effects on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
