Conclusion/Brief comment:

This application is for a variation to the previously approved FULL/2024/1444, the previous application was for a dower unit, whereas now the application is for an extension. The applicants agent called to say they no longer wished to have a separate dower but would treat the addition as an extension to the main dwelling.

When designing a dower unit there are size restrictions as the dower should be ancillary to the main dwelling and be of a proportionate size of the main dwelling. However, an extension to a main dwelling does not have size restrictions, other material considerations and the IDP policies are in place to ensure designs are acceptable.

The proposals achieve a reasonable standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
