Conclusion/Brief comment:

Planning permission is sought for the installation of a shipping container on one of the individual storage compounds within the site.

The shipping container measures 2.4m in width by 2.5m in height by 6.1m in length, is of a standard scale, design and appearance and will match the existing containers on site. The container is well screened from the surrounding area by the acoustic fencing and by planting situated along the boundaries of the site. It will have minimal visual impact and would not negatively affect the openness or landscape character of the surrounding area.

The container will be used for storage ancillary to the main industrial use of the site/compound and its need has been demonstrated as part of the supporting information for the application. The scheme therefore accords with Policies OC3, GP1 and GP8 of the IDP.

The unit hereby proposed can only be used in association with the storage use of the land, any other use would require a further application for planning permission. In light of that fact and given the limited visibility of the container from outside of the site, it is not considered necessary to require removal of the container should the authorised use cease.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
