OFFICER'S REPORT

Brief Description of the site:

Les Haguets, Route De Vaugrat is a detached two-storey dwelling with single-storey extensions to both sides and a conservatory and flat roof extension to the rear. A detached outbuilding/garage is situated adjacent to the west site boundary.

The application relates to the demolition of the conservatory and small single-storey extension to the rear along with an existing shed and the erection of a single-storey flat roof extension to the side/east elevation with vertical larch cladding. Alterations are proposed to the existing two-storey flat roof extension including changes to fenestration and replacement roof covering (single ply membrane), incorporating flat roof rooflight. Timber cladding is proposed to the exterior of the existing extension. The replacement windows and doors in the attached garage and the proposed window to the front façade do not represent exempt works.

The re-roofing of the existing house, two-storey flat roof extension, garage and lean-to represent exempt works as does the remaining changes to fenestration at ground floor level.

The site is located Outside of the Centres as designated in the Island Development Plan. The property is a pre-1900 building.

Conclusion/Brief comment:

The existing outbuilding, conservatory and single-storey extension are of no particular merit to warrant their retention and their removal is accepted.

The proposed contemporary style single-storey extension represents a good standard of design that respects the local built environment. The proposed extension is to be set away from the site boundaries and will not result in overshadowing or loss of light to the occupiers of the adjoining dwelling. The extension will not result in overlooking or loss of privacy to neighbouring residents. Its location is also such that this aspect of the development would represent exempt works.

The extensions and other alterations proposed will offer more flexible accommodation that can respond to the changing needs of occupiers and changes to fenestration will ensure that the dwelling continues to provide occupiers with adequate sunlight/daylight to accommodation.

In view of the above the scheme accords with the aims of the Island Development Plan and is recommended planning permission is granted for the proposed development.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
