OFFICER'S REPORT

The application site comprises a dwellinghouse located at the eastern end of a terrace of dwellings set on the north side of the Rohais. The St John's Ambulance Station is located to the north of the site, with the associated access running along the east boundary of the site. The application site benefits from parking to the front, accessed from the Ambulance Station access.

Conclusion/Brief comment:

Permission is sought to raise the roof of the building to form second floor accommodation, incorporating dormers windows to the front (south) and side (east) elevations and two rooflights and a suntunnel to the side (west) elevation.

The built form in this area comprises a mix of forms and the height of buildings varies. The increase in height to the roof at the application site would not have any significant impacts on the appearance of the dwelling, or the character of the surrounding area. Whilst dormers are not obvious within the terrace in which the application building is located, dormers are present on the buildings across the road and further to the east. In this context the introduction of dormer windows as proposed would not have any significant impacts.

The proposals would not result in significant additional impact on adjoining properties in terms of overbearing or overshadowing.

The dormer windows proposed to the east elevation would face over the Ambulance Station access road towards the rear of the adjacent property in that direction, at a distance of c11m. Taking into account the separation distance, the slightly higher level of the adjacent property and the intervening extension/outbuilding on that property, any overlooking arising would not be sufficient to warrant changes to or refusal of the application.

The rooflights to the west elevation would have a minimum cill height of 1.7m, preventing any overlooking in that direction.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
