Conclusion/Brief comment:

This is a revised application is to raise, extend and alter the roof ridge height to allow for more first floor accommodation, including a balcony at first floor level. Extend at ground floor level, enlarging the entrance area. This is a scaled back version of the previously approved FULL/2024/1143.

The main proposal is the re-design of the roof to accommodate more first floor rooms, the new roof features a double pitch with a filled in central flat roof area. The new roof helps to balance the buildings proportions. The proposals change the main entrance to the building to the side, leaving the original front door as a separate entrance into the office.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extensions will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extensions and alterations are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on any of the neighbours due to the distance between them.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
