### Conclusion/Brief comment:

This application is to replace all of the north and south window sashes of this protected building.

It has been noted in the supporting statement that none of the sashes are original, they were all changed in 2007.

The window frames and boxes are to remain with new sash windows installed.

The proposals are considered to achieve a good standard of design, they are not considered to have a detrimental effect on the special interest of the protected building, the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
