Conclusion/Brief comment:

This application is to demolish the chimney and patch the roof and alter and widen the vehicular access and repave the driveway with permeable paving.

There are many of these square hipped dwellings on the island, some have retained their chimneys and some have opted to have them removed, either way the properties look good either with or without their chimneys.

At present the narrowest part of the driveway is 3.5m and the proposal is to extend this to 4m, the retaining wall will be removed and the granite reused to build the new wall in its new location.

The proposals are not going to significantly increase the traffic flows on and off site and with this in mind the changes are considered acceptable and appropriate. The proposals are not considered to have any impacts on the character and appearance of the surrounding area, nor will they impact on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
