Conclusion/Brief comment:

This application is to install rooflights and solar panels to the south roof slope of the barn and to change a door and two windows on the south elevation, two windows on the east elevation and one door and two windows on the north elevation.

The barn is split into two, it is the east end of the barn which is being developed into a games room, toilet and hall with stairs on the ground floor and a storage area at first floor level.

The proposals are considered to achieve a good standard of design, using the existing openings in the building to replace with new windows and two doors. The

changes will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
