Conclusion/Brief comment:

This application is to erect a small single storey detached garage with a pitched roof to the northeast corner of the front garden. It will be tucked behind the main roadside boundary hedge, 2m from the boundary.

The previous pre-application showed a much larger garage outbuilding and after the pre-application response the structure has been reduced in size and pulled further away from the road closer to the main dwelling.

Route de Jerbourg does have a fairly defined building line without many structures built forward of this line. However, further up the road along Route des Blanches there are some properties which have their gable directly onto the road and some dwellings which are located much closer to the road than their neighbours, a more fluid building line.

Paloma is built further away from the road than the neighbours to the west and east, and as the location of the garage is now closer to the house the road side elevation could be a continuation of the western building line, which then jumps back 4m to the eastern building line.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The scale and massing of the new garage outbuilding is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
