Conclusion/Brief comment:

This application is to install a dormer window and two small rooflights to the rear roof slope, and some alterations to the fenestration to the rear elevation of the property.

The two small roof lights and the change of a window to a door on the rear elevation are both considered exempt works and therefore will not be assessed as part of this report.

The dormer window does match the neighbours dormer window, so there is some consistency. The proposal is considered to achieve a good standard of design, using materials which complement the existing materials. The new dormer will provide

adequate levels of sunshine and daylight, and the proposals give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new dormer is not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will it have any detrimental impacts on either of the immediate neighbours.

There may be a little increase in the amount of overlooking into the neighbours gardens but it is not considered to be increased so much that it warrants a refusal.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
