Conclusion/Brief comment:

This application is to extend and alter the existing property, incorporating the existing garage into the property by making it a utility/boot room, removing the conservatory and erecting a single-storey extension to house the dining room and swapping the lounge and kitchen. The scheme also proposes to alter ground levels to extend the parking and to widen the existing vehicular access.

Due to the current exemptions, the only works which require planning permission are the proposals to widen the vehicular entrance and associated changing of land levels to provide further hardstanding for parking/turning.

The vehicular entrance is very tight at present and widening it to 4.5m is considered to be appropriate and acceptable, as are the changes to ground levels in order to enlarge the parking area at the front of the property which will allow easier manoeuvring on site to enable vehicles to exit the site in a forward gear.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
