Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The proposal adopts a good standard of design by virtue of its scale, form, massing, siting and materials.

The extension is considered in keeping with the rear built form of the surrounding area and due to its position the proposal will not be highly visible in public views.

Whilst the proposal incorporates a roof terrace to the rear of the extension, the roof terrace is sufficiently setback from neighbouring properties, and together with mature landscaping which bounds the west and north boundaries, is not considered to cause undue harm to neighbour amenity.

Overall, the proposal will not have a detrimental impact on the character of the area, visual amenity, or the amenities of neighbouring residents.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies and accords with the purpose of the Law and the Material Planning Considerations. It is therefore recommended that planning permission be granted, subject to conditions.
