Conclusion/Brief comment:

This application is to demolish the existing glasshouse and to erect a garden room and store to the south east of the main dwelling.

The ancillary building, despite being large, is attached to the garage and is well related to the main dwelling, designed to look out onto and share the garden space immediately adjacent to the main dwelling.

The proposals achieve a good standard of design, using materials which complement the existing materials. The garden room will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new garden room is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
