OFFICER'S REPORT

Brief Description of the site:

The site known as 'Acorn House' is to the east of Kings Road and comprises a 1980's infant school for Elizabeth College, the school buildings are to the east of the site and the play area and parking to the west of the site. There are neighbouring residential properties to the north and east and land associated with a detached dwelling to the east.

The site known as 'Beechwood School' comprises a late 1800's building, originally a house, and a larger 1970's purpose built school building set within a 'C' shaped plot situated to the west of Queens Road. There are residential properties to the north, west and south.

Both sites are located in the St Peter Port Main Centre Outer Area and is within a Conservation Area as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to replace some hardstanding and fencing around the south and east elevations of Acorn House, and enlarge the existing netball court to form a tennis court, replace some fencing and install some hardstanding and climbing frame to the southeast of Beechwood School site.

The Acorn House hardstanding is very close to the school building and comprises artificial grass, rubber surfacing and hoggin, all child friendly surfaces. There are no concerns about these changes or the replacement fencing when considering the aims of the IDP.

The works to the netball court will update the court giving additional space for the players and spectators and potentially makes the space suitable for a variety of sports (netball/tennis etc). The new climbing frame will replace an existing timber climbing wall and single climber which is reaching the end of its useful life. This will update the space and give the children more activities within the space.

The proposals are considered to achieve a good standard of design. The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will they have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
