Consultations:

The Office for the Environmental Health and Pollution Regulation.

'I have reviewed the proposed plans for the installation of gates, handrails and lighting at the above site. I can confirm that I do not wish to raise any objections to the proposals.'

Conclusion/Brief comment:

This application is to realign the front railings either side of the front door and extend them to the front roadside boundary, with a set of gates to enter the front patio either side of the front entrance. The lower rail of the railings will have a led lighting strip inserted to aid and improve accessibility to the building.

Realigning the railings outside the front door to enable improved accessibility is a proposal which outweighs the special interest of the existing railings, which are not necessarily original. The proposals are not considered to adversely affect the special interest of the protected building or its setting.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The proposals are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will they have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
