Conclusion/Brief comment:

This application is to demolish the rear chimney and to undertake alterations to the front and rear dormer windows. The alterations consist of re-cladding the dormer cheeks and re-roofing with slate rather than tile.

Re-cladding the dormer cheeks with uPVC cladding as initially proposed would be introducing an un-natural material which would be at odds with the age and style of the property, especially as it is within the Conservation Area,

where there is a statutory duty to “[pay] special attention... to the desirability of preserving [i.e. not harming] and enhancing the character and appearance of that area.”

Therefore the application was deferred to request that the cheeks were re-clad with slate as existing, rather than change the material. This was agreed by the applicant.

The brick chimney stack and clay pots proposed for demolition, whilst characteristic of the area, are not a prominent feature being positioned on the rear elevation of St Anne and removal would not harm the character, architectural or historic interest or appearance of the Conservation Area.

The proposals are now considered to achieve a good standard of design, using materials which complement the existing materials. The scale and massing of the proposals are now not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will they have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
