Conclusion/Brief comment:

This application is to remove a section of roadside boundary hedge and alter the roadside wall to widen the vehicular access.

Les Ruettes is a very narrow lane (less than 3m) and turning into the property at present is a little tricky, and it is noted that larger trucks (e.g. sewage trucks and delivery vans) all struggle to turn at this access.

Initially the proposal was to widen the existing opening (3m) up to 5.8m, which is considered too wide for this small and narrow rural lane having regard to its existing character. The application was deferred for amendments and the reduced opening is now 5.3m which is considered to address the access/turning issue without unacceptably altering the character of the area.

The proposal is to create a low upright sleeper retaining boundary wall which will curve round (radius 2.7m) from the road into the site, with a newly planted hedge on the inside to match the existing hedge. The sleeper wall will be no taller than 0.9m, represents exempt development.

The proposals are now considered to achieve a good standard of design, using materials which complement the existing materials. The proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have an adverse impact on any of the immediate neighbours.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
