Conclusion/Brief comment:

This application is to erect a single storey extension to the rear of the property, extending the existing garden room and to alter ground levels, add external steps and extending the patio area at the rear south of the property.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels

of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, or the special interest of the protected building; nor will it have any impact on either of the immediate neighbours. Finally, the proposals are not considered to have any adverse impacts on the setting of the nearby protected buildings.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
