Conclusion/Brief comment:

This application is to partially demolish the existing conservatory and re-build it as a single storey extension with a raised terrace area to the northwest rear elevation and alterations to the fenestration.

The adjoining property also has a conservatory at the same ground level, to ensure there will be no increased overlooking the northeast balustrade of the raised terrace will become a 1.8m high privacy screen with obscure glazing.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours due to the mitigating privacy screen.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
