Conclusion/Brief comment:

This application is to demolish the small rear porch and erect a single storey extension and raised terrace area to the south rear elevation and some other alterations to the fenestration around the dwelling.

The alterations to the fenestration are considered exempt works and will not be assessed as part of this application.

There has been new fencing erected around the east, south and west boundaries which is 2m high, the proposed terrace will have a finished floor level approx. 900mm above the existing ground floor level. The terraces is over 10m away from the east and west boundaries and approx. 8m away from the rear south boundary. However, the distance to the boundary and the neighbours extension will prevent overlooking from the terrace into the southerly neighbours garden.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
