Conclusion/Brief comment:

This application is to erect a single storey flat roof outbuilding to the southeast corner of the site housing a gym and home office. The window and cladding will match the main dwelling.

Although close to the boundary with the neighbour, the location of the outbuilding will not cause any overshadowing because it is due north of the neighbours garden, and therefore not in the way of the daily sun path.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The outbuilding will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new outbuilding is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
