Conclusion/Brief comment:

This application is to remove a hedge from the west boundary, demolish a 4.2m section of front south boundary wall to create off street parking.

Many of the properties along this part of Mount Row have had their front boundary walls partly or removed entirely for parking over the years, this gives a very open and wide feeling to the street. Trelawney is the last residential property on the north side of the street before Le Vauquiedor.

Mount Row and Le Vauquiedor are classed as Traffic Priority Routes within the Traffic Engineering Guidelines for Guernsey, which means the speed limit is 35mph. The document goes on to say the sightlines must be 33m on a road with a design speed of 35mph. The submitted drawing has shown sightlines of 20m, but both roads are very straight and so 33m can be achieved.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
