Conclusion/Brief comment:

This application is to alter the north roadside boundary by relocating the vehicular entrance to a 4m opening in the centre of the boundary, with a 600mm high granite wall on either side. Plus remove a dying hedge along part of the east boundary, replacing it with a fence.

The drawing also shows an outbuilding/studio and a covered walkway on the plan, both of which were determined as exempt works during the pre-application process, and therefore will not be assessed as part of this application.

The removal of the dying hedge is considered appropriate and acceptable, and the 2m high replacement fence would provide an appropriate replacement boundary.

The existing vehicular opening is approximately 5m, by relocating it to the centre of the north boundary it will be reduced to 4m, which is considered a reasonable sized opening. Moving the entrance westward by a few metres is not considered to have any highway safety issues and the proposals including a low wall either side of the access are likely to enhance sightlines, however the details of the wall are limited so a condition shall be added to ensure the style of granite wall is appropriate for the area.

The proposals are considered to achieve a good standard of design, using materials which complement the surrounding area.

The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
