### Conclusion/Brief comment:

This application is to Erect a first floor extension to the rear south elevation and install two dormer windows to the front north elevation. The extension will provide first floor accommodation comprising two bedrooms and a bathroom.

Installing a first floor is encouraged as it is an efficient and effective use of land and supported by the Island Development Plan. The only concern would be the possibility of overlooking into the nearby neighbours gardens. The only first floor window of concern is the south facing bedroom window, it is 8m from the boundary, and would overlook a small part of the southerly neighbours garden.

However, the height of the south boundary wall and the wraparound nature of the neighbours garden means that on balance the overlooking is not considered to be so much to warrant a refusal.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
