Conclusion/Brief comment:

This application is to erect a single storey outbuilding/summer room along the eastern boundary.

The eastern boundary is a high block wall and there is an area of hardstanding in front of it, which denotes the footprint of the new building.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The outbuilding will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new outbuilding is not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will it have any impact on either of the immediate neighbours including the setting of the protected building to the north.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
