OFFICER'S REPORT

Brief Description of the site:

The property known as 'Le Bas Marais' is a modern one and a half storey dwelling which is a replacement dwelling constructed in 2013. The dwelling is set back from and faces northwest onto Route de la Perelle, there are neighbouring properties to the northeast, southwest and south, with open fields to the southeast and the coast to the northwest across the road. The property is located Outside of the Centres as defined in the Island Development Plan.

Relevant History:

FULL/2025/0475 – Erect single storey extension with balcony at first floor level to southwest side elevation – Refused June 2025.

The proposals by virtue of the scale, mass and form of the stepped parapet walls and balustrade to the first floor terrace, would not constitute good design and would detract from the character and visual amenity of the locality contrary to Island Development Plan Policies GP8(a) and GP13(b)

Existing Use(s):

Conclusion/Brief comment:

The refused scheme was for a 1.1m high balustrade to the front with a brick wall with glass balustrade above towards the rear.

This application is to erect a single storey garage onto the southwest elevation of the dwelling with a first-floor balcony above. The balcony will have a 1.1m high glass balustrade along the front/northwest edge and front part of the southwest edge. The balustrade is shown to raise up to a 1.8m high obscure glazed privacy screen for the rest of the southwest and to the southeast edges of the balcony to prevent any overlooking into the neighbours private amenity spaces.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension and balcony will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension and balcony are now lighter in appearance and are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have an unacceptable adverse impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
