Conclusion/Brief comment:

This is a partially retrospective application to add a small fill-in extension to the rear (west) of the property and add a raised terrace area to the west elevation.

Initially the terraces north balustrade gave the occupiers the opportunity to look directly into the northerly neighbours garden, the application was deferred to allow the agent to add a 1.8m high opaque privacy screen to the terrace.

The proposals are now considered to achieve a good standard of design, using materials which complement the existing materials. The extension and terrace will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension and terrace are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours now there is a mitigating privacy screen.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
