Conclusion/Brief comment:

This application is partially retrospective to realign the south side of the roadside boundary wall so that it is 525mm closer to the tree, widening the existing vehicular opening. The proposed works are to remove the granite nib (approx. 400mm) on the

north side of the existing opening and lower the wall in one area, so that it is a consistent height for better sight lines for the occupiers.

The total width of the opening will be 4.25m, which is only slightly over the exempt opening of 4m. The property is located on a bend in the road and widening the opening will improve road safety for car entering and exiting the property.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
