GP9: Sustainable Development

Conclusion/Brief comment:

This application is for a change of use of the front two storey office to become a two bed maisonette, with two bedrooms at ground floor level, entrance hall and bathroom to the rear and the lounge and kitchen on the first floor.

Policy MC4(A) supports a change of use of offices to other uses as long as the office space is below 250sqm. Policy MC2 supports proposals for housing development, provided all other relevant policies are met. The internal space of the unit is approximately 68.3sqm, falling within the requirement for loss of office,

whilst meeting floor space requirements for a three person maisonette. Given the limited floor area and constraints associated with the conversion of an existing building, it is not possible to seek a mix and type of unit in this case.

There would be no changes to the front façade of the building and other alterations would be limited and discretely located, which means that policy GP4 is also complied with. The design of the residential unit includes outdoor amenity space, an existing roof terrace which the kitchen/lounge looks out upon and is a communal space for all three units. The proposals also include space for bike storage, but no car parking space, which is not necessary when in the town centre, as there is plenty of public transport and several amenity spots within walking distance.

The proposals are considered to achieve a good standard of design. The changes will provide adequate levels of sunshine and daylight, and give the residential occupiers flexible and adaptable accommodation. The arrangement of the living accommodation and fenestration would prevent significant impact on the amenity of the proposed unit from others accessing the shared terrace.

The change of use from office to residential accommodation is not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will it have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
