the clos and faces southeast onto the clos. Conclusion/Brief comment:

This application is to retrospectively replace a fence to the south and east boundaries of the front garden.

The clos properties have limited rear gardens and so being able to use the front garden as well gives the occupiers more amenity choices. The existing front garden boundary walls are only 0.5m high, so many of the clos properties have increased the height by adding either planter boxes, hedging or lattice, slatted or hit and miss fencing.

Most of the additional are around 0.5m or less and would not require planning permission. And one or two because of the height may have required planning permission, including this property.

The overall height of the fence is 1.42m. The proposal seeks to give greater privacy to their front garden, and by virtue of the range of styles of boundary treatments within the clos, the proposal is not considered to have any detrimental impacts on the character and appearance of the surrounding area, nor will it have any adverse effects on neighbour amenity.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
