**Conclusion/Brief comment:**

Retrospective planning permission is sought to retain an area of timber decking (4.2m x 2.5m) and rite-pave grass grid ground stabilisation system (2.5m x 2.5m) on land to the west of the kiosk building. The decking and grass grid system has been installed to provide a safe, level and durable surface to accommodate outdoor seating associated with the kiosk.

The land in question has a long established use (dating back to 2001) as a seating area for tables and chairs used in association with the kiosk building. The proposal would therefore not alter the use of the land in question. That said in the event that they were required to be removed, the decking and grass grid system could be easily removed and the land reinstated to its former condition.

The scheme is of limited visual harm, in-keeping with the character and appearance of the surrounding area and would not harm the amenities of surrounding uses.

The works are sufficient distance from the road so as not to impede access for vehicles or for pedestrians.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
