Conclusion/Brief comment:

This application is to relocate the vehicular access from the east end of the north boundary to the centre of the north boundary. Extend and alter the property at ground and first floor levels, to create a double garage at the front of the property and slightly enlarge the snug at ground level and to add two bedrooms and a bathroom at first floor level.

The addition of a ground floor double garage and rear snug extension are not considered to raise any issues and are considered appropriate and acceptable.

Overall the proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extensions will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The first floor extension on the east side will not have any windows on the east elevation to protect the nearby neighbours, and after a deferral the first floor window on the north elevation has been changed to a high level landscape window to prevent overlooking into the northeasterly neighbours rear garden.

The scale and massing of the new extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The relocation of the access will result in road safety improvements, without adverse impact on the character of the area, subject to closure of the existing access within an appropriate time frame.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
