Conclusion/Brief comment:

This application is to demolish the rear porch, the front roof-slope dormers and the rear chimney. Then install a cabrio rooflight and rooflights into the north rear roof-slope, install rooflights to the south front roof-slope, re-point the gables, install external insulating render system to the rear part of the dwelling and some alterations to the fenestration.

Removing the rear chimney and replacing the front dormers with heritage rooflights are both considered acceptable and appropriate, as is the removal of the rear porch and installation of the cabrio rooflight and other rooflights on the rear roof slope.

The external insulating render system and alterations to some of the fenestration is also deemed acceptable. However, it would be desirable if the decorated hidden gutter and dentils could be replicated to keep the style and appearance of the building traditional rather than removed entirely.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The scale and massing of the new proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
