OFFICER'S REPORT

Brief Description of the site:

Planning permission is sought for a first-floor extension to allow for the installation of a lift at the property. The external materials to be used include seamed zinc cladding and uPVC glazing.

The site is situated Outside of the Centres and within a Conservation Area as designated in the Island Development Plan.

Policies considered most relevant:

GP4: Conservation Areas

GP8: Design

GP9: Sustainable development

GP13: Householder development

Conclusion/Brief comment:

The extension is required to facilitate the installation of a lift with a lobby area and allow improved access within the dwelling, this is acceptable in principle under Policy GP13 which allows householder development. The small lobby area has a glazed roof with uPVC windows and links the lift to the first floor accommodation. The lift shaft has a flat roof over with seamed roof sheeting in zinc, or similar, to the elevations which matches the existing building.

The proposal is not considered to have a harmful impact on the Conservation Area and will not harm its special character, and the design is considered appropriate to the setting. The proposal therefore accords with Policy GP4, GP8 and GP9.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
