Conclusion/Brief comment:

This application is to install first floor windows to either gable on the east and west elevations of the property.

The east gable looks over the adjacent water filled quarry where no overlooking will occur. The west gable looks over the east gable of the neighbouring property, their east gable has two windows facing the applicants driveway. In light of these windows, the proposed window on the west gable will have obscure glazing to manage the potential for mutual overlooking.

The proposals achieve a good standard of design, using materials which complement the existing materials. The proposals will provide adequate levels of sunshine and daylight to the first floor bedrooms and give the occupiers more flexible and adaptable accommodation.

The proposals are now not considered to have any detrimental impacts on the character and appearance of the surrounding area, nor will they have any impacts on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
