Conclusion/Brief comment:

This application is to remove a section of earthbank to erect a 2.4m x 16m lean-to extension to the northwest elevation of the existing trolley store for additional trolley storage.

Previously the proposal was to erect a separate detached structure to the north of the existing trolley store, which would have been deferred because it did not relate well to the existing structures. However, after a site visit had been carried out, the applicant asked if amended drawings could be submitted. The amended drawings now show the lean-to on the back of the existing storage block, which is a much better solution.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of storage with access from either end.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
