Conclusion/Brief comment:

This application is to remove the chimneys from the main dwelling and demolish the existing outbuilding. Erect a single storey pitched roof extension to the east elevation to house a lounge, study and master bedroom suite. Erect a porch to the north elevation and install an external insulating render system (EIRS) to the main dwelling and alter some of the existing fenestration.

The porch, EIRS, alterations to the fenestration and demolishing the chimneys are all considered exempt works and so they will not be discussed as part of this application report.

The rear extension is quite large, but at present the dwelling does not have a dedicated lounge or a master bedroom. The size and shape of the extension will balance the property with a pitched element at either end, a little unusual, but will be read as two separate structures from further afield rather than one large property.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
