Conclusion/Brief comment:

This application is to demolish the existing conservatory and erect a single storey rear and side extension to house a lounge, entrance hall and ground floor bathroom. Alter the rear ground levels to create a patio off the living room, and widen the vehicular access by 650mm in the southwest corner of the site.

At present the front of the property houses an ancillary living unit; kitchenette, lounge, bedroom and ensuite with access to the rear of the property. The back part of the property houses a kitchen, dining room and conservatory at ground floor, and three bedrooms and two bathrooms upstairs. Presently the rear part of the ground floor of the property does not have a dedicated lounge.

The proposals will remove the conservatory and replace it with the proposed extension, with the addition of a main entrance hall and ground floor bathroom. The west wall of the bathroom will be built across the width of the drive replacing the existing gates, the wall will look like the traditional parapeted wing walls that traditionally face dower extensions.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Rue du Belial is a narrow rural lane and the existing entrance width is a little tight. By removing the southern bellmouth of the entrance the width will allow much easier turning in and out of the entrance. In this instance the widening of the entrance is considered appropriate and acceptable.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
