OFFICER'S REPORT

Brief Description of the site:

The property known as 'Aviemore' (previously Bali Hai) is a large detached 1970's bungalow which is set back from and faces south onto Les Hurettes. There are other large detached properties to the east and west and smaller residential properties to the south across the road. To the north is an open field. The existing vehicular access has a wall to the western corner and a hedge to the east which is set back from the roadside boundary with an area of hardstanding in front.

The property is located Outside of the Centres as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to demolish the existing conservatory and replace it with a larger 'L' shaped conservatory on the north rear elevation, add a small infill extension to

the east elevation, some alterations to the fenestration and remove a section of wall to widen the vehicular access.

The infill extension and the alterations to the fenestration are all considered exempt works and shall not be assessed in this report.

The new conservatory is single storey and fully glazed, but due to the robust boundaries comprising hedging and fencing the proposal is not considered to have any impacts on the character and appearance of the surrounding area, nor will it have adverse impacts on neighbour amenity.

Les Hurettes is a very narrow lane and many of the vehicular accesses are over 5m wide or have an entrance and an exit. The existing opening including the setback hedge with hardstanding to the front is approx. 4.7m (driveway width c. 3.7m) but access from the west is limited due to the width of the lane. The set back position of the east boundary hedge will also likely help vehicles accessing the site. By removing 1m of the west side of the roadside boundary the overall opening would be approx. 5.7m with a bellmouth element to the east retained, in front of the hedge, the driveway width will be c.4.7m. The ability to access the site from the west would be improved.

As there are other wide accesses onto site in the area the proposal is not considered to have unacceptable detrimental impacts on the character and appearance of the surrounding area, nor will there be adverse effects on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
