Conclusion/Brief comment:

This application is to remove the existing single dormer on the rear roof slope and replace it with a much larger dormer across the whole of the rear roof slope with two windows, and replace the front facing garage door with two regular sash windows.

At ground floor level the garage will become a ground floor bedroom, and the new dormer on the rear roof slope will increase the size of the master bedroom and wardrobe and the stairs/landing leading up to the second floor.

The landing window (the most southerly of the two dormer windows) will be at a higher level than the actual landing it serves, reducing the ability to overlook the neighbours. The angle to overlook the closest neighbour to the is too oblique to

warrant a refusal and the distance to the boundary with the next neighbour is over 10m and therefore not considered an issue. The other dormers are further away from the boundaries and look straight down the garden to the west.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The new dormer and windows will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new dormer and windows are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
