OFFICER'S REPORT

Conclusion/Brief comment:

This application is to install replacement windows and doors on all elevations of the property. Five windows and a front door to the south elevation, one door and one window on the west elevation and one small window on the north elevation.

The building is a small fill-in building located behind the main street as part of the hillside town. The front door is reached by some steps leading up to Burnt Lane, it is a three storey property with more steps leading up and round to the west, which is why at first floor level there is another external door.

Due to the proximity of all the other properties this small building is not really seen from any public vantage points and certainly not from any distance. The building is not protected and although the dwelling is within a conservation area, the design

and style of the proposed windows and doors are considered to be appropriate and acceptable.

The proposals are considered to achieve a good standard of design. The new windows will provide adequate levels of sunshine and daylight. Plus, they are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will they have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
