### Conclusion/Brief comment:

This application is to extend and alter at ground and first floor levels. At ground floor the west end bedroom would be enlarged and a dressing room added, and at first floor a large first floor dormer window extension will be added to the south elevation to increase the first floor space by including a study/extra bedroom.

The ground floor extension is minimal and is considered to be appropriate and acceptable. The first floor south elevation large dormer extension would overlook the property's pool and wooded plot beyond. There are no concerns of overlooking and the extension will fit the existing style of the building.

The proposals are all considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
